Capability Statement

CIVIL REMEDIATION & REPAIRS

LEADING EDGE TECHNOLOGY

Vero Laser provides asset remediation, repair, and maintenance services for the civil, construction, and asset maintenance sectors.

THE VERO LASER ADVANTAGE

Vero Laser delivers the highest quality outcomes to asset owners through cost-effective, innovative, and environmentally beneficial services.

01

EASIER SAFER BETTER

- Ease of operation
- No abrasive material
- No encapsulation required
- Major reduction in clean up times
- Superior coating, oxide removal
- Superior contaminate removal
- Minimal heat transfer

02

ENVIRONMENTALLY SUSTAINABLE

- No uncontrolled run off
- Eliminates dust
- Major noise reduction
- No damage to substrates
- No chemicals and detergents
- Low power consumption

03

OPERATIONAL EXCELLENCE

- Superior health and safety benefits
- Minimal PPE required
- Fast set up times
- Precise removal for inspection
- Corporate environmental benefits
- Minimal disruption to other trades
- Minimal disruption to public spaces

CIVIL REMEDIATION & REPAIRS SERVICES

Our whole-of-life approach is what sets Vero Laser apart, with expertise in:

- Concrete repairs including spalling, joint sealing, and crack injection for structural and durability repairs
- Injection technology, waterproofing and infrastructure maintenance
- Industrial coatings and ground stabilisation
- Repair and rehabilitation of manholes using our HDT unit

Vero Laser provides systems-based solutions for the repair and protection of all concrete structures.

VERO LASER PROVIDES QUALITY CIVIL SERVICES FOR:

- ROAD, RAIL, TUNNEL AND MAJOR INFRASTRUCTURE DEVELOPMENTS
- UNDERGROUND CAR PARKS AND RAIL PROJECTS
- WASTEWATER TREATMENT PLANTS AND RESERVOIRS
- JETTIES, BRIDGES, AND LIGHTHOUSES

Our company has a successful track record in managing repair, remediation and maintenance projects for:

- The Shire of Carnarvon: Sea wall repair
- Bendora Dam: Downstream bridge repairs
- Fred Haigh: Concrete repairs
- Story Bridge: Corrosion condition assessment
- And many more

PRODUCTS AND APPLICATION SERVICES

Vero Laser delivers more than world leading laser cleaning services we also operate to safe environmental practices and uses only environmentally friendly products for joints and cracks in all building and construction repair work.

Vero Laser is recognised as a qualified applicator for BCS to apply quality construction chemicals imported from world-renowned chemical manufacturer MC-Bauchemie GmbH of Germany.

Vero Laser provides a direct contract service to the civil and marine sectors with some of the world's most innovative concrete repair products and maintenance engineering solutions including Laser Cleaning and Magnetic Heat Induction.

We combine the strength of national business affiliations with smart, innovative and safe construction solutions to deliver quality outcomes for all clients.

PROJECT MANAGEMENT

The Vero Laser team includes a recognised board of industry professionals, internationally and locally trained technicians and tradespeople experienced in all aspects of civil and marine remediation.

Our affiliations with engineers also provide expert advice and guidance throughout each project. This highly skilled workforce delivers best practice safety and management systems and takes a commonsense approach to achieve strong project outcomes.

Our qualified professionals provide quality project management including:

- Project plans, drawings, costing and scheduling.
- Expert advice regarding product selection, application methods and equipment.
- Engineering management, staffing and onsite supervision.
- Quality control and quality assurance.

COMPANY OVERVIEW

A subsidiary of a disruptive technology entity, Vero Laser delivers quantifiable value through property and infrastructure services across Australia.

Vero Laser is lead by Ben Gunness, a recognised industry leader who has over 18 years experience working with government, multinationals, and major Australian contracting firms.

Vero Laser is, as are progressive industries, taking advantage of the industrial laser cleaning benefits. Those include advancements in fibre optics, lower cost and higher performing lasers, a greater emphasis on environmental sustainability and health benefits of the process.

ASK FOR A VERO LASER CLEANING TRIAL OR CASE STUDY

We offer on the job laser cleaning trials as well as case studies on request.
